- ✓ Fast implementation through web-apps and integrable software services

- ✓ Tailored to individual needs and flexible data interfaces
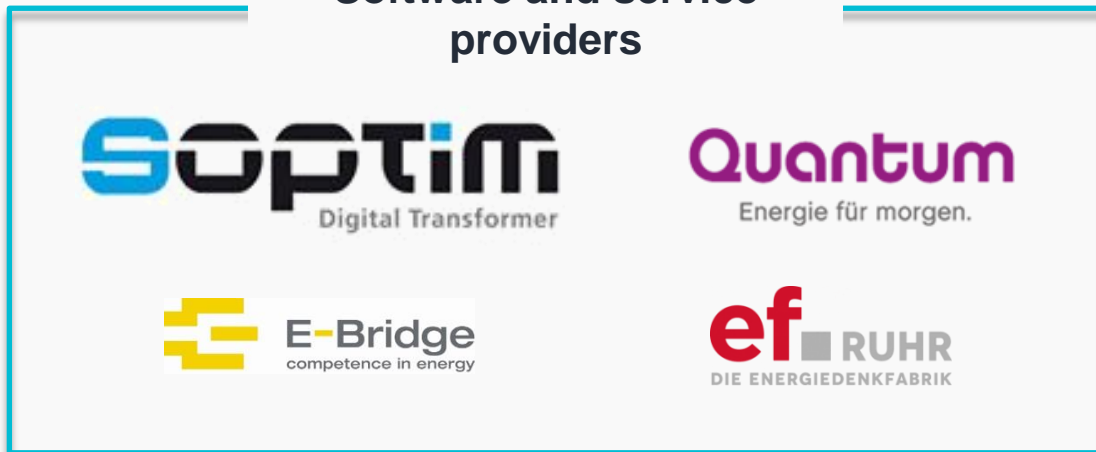

# Selected customers and projects

TSOs/DSOs

Industry und utilities

Software and service providers

Credentials

One of 9 German AI Startups in 2018 for **Enterprise Intelligence (Internal Data)**

logarithmo *off-the-shelf*

logarithmo *customize*

logarithmo *tailor-made*

logarithmo *disrupt*

logarithmo **portfolio – examples**

Digital energy consultant
(automated metering analses)
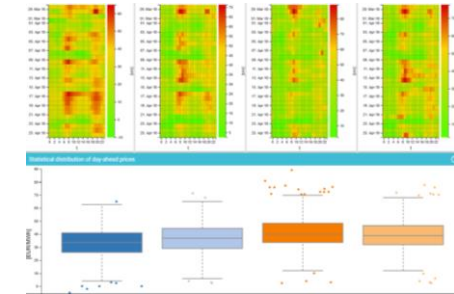

Der Digitale Energieberater

www.digitalerenergieberater.de

AI-based
**energy management**
for **industry & municipalities**

MONAENERGY

www.mona-energy.de

Value-added services
as **white label**
(e.g. for **smart meters**)

Tailor-made
analytics services for
grid operators

Tailor-made services for
forecasting & optimization

New web-apps
for your customers
for data-based use cases

and many more…

**Added value through agile development in cooperation**

New services in 3 steps

Data and problem

- Internal data
- Problem
- Idea for solution

Data analytics and logic

- Alogrithms and analytics
- External data
- BI, KI, optimization, forecasting, simulation,…

Provision as SaaS / web-app with HQ GUI

- New services for customers
- White-label possible
- API or web-app

Use cases for collaboration?
Please contact us after the session!
